

HOYA

A Vertical-type Projector with 50 Charts

CP-300

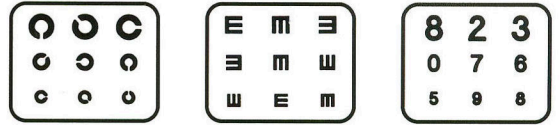

HOYA Vertical-type Projector CP-300

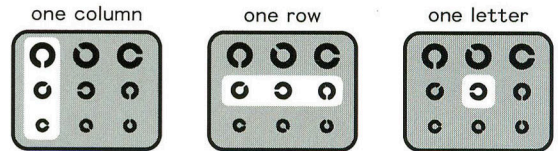

50 Different Charts the Subject Can Recognize Easily Makes Possible More Precise Measurements.

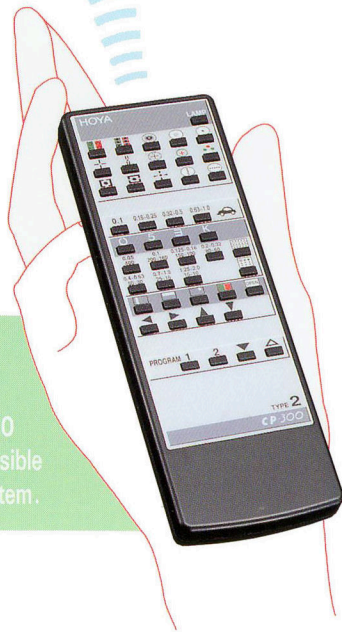

In addition to the familiar Randolt's rings and alphabets, numerals, pictographs are included as standard equipment, making it possible for you to measure even children's visual acuity precisely.

A rich variety of masked displays.

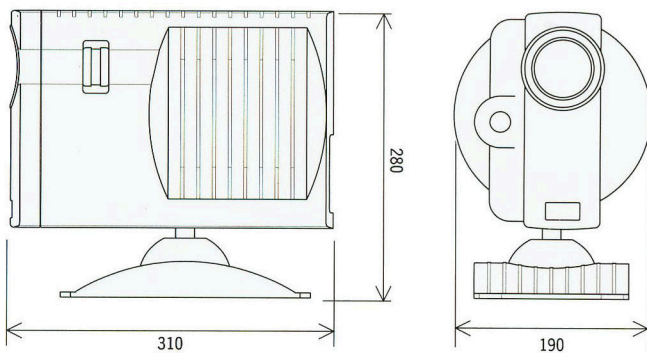

A highly maneuverable remote controller, which can have the charts displayed on the MDR-3000 /RH-3000 Controller, making it possible to use the CP-300 as part of a system.

It is possible to program the display of the chart masks in two different sets of a maximum of 50 different steps, according to a required set of measurements.
